A Transparent, Decentralized Custody
Framework for **Modern Microschools.**

EMPOWER STUDENTS. BUILD LEGACY.
SOVEREIGN WEALTH ARCHITECTURE. POWERED BY SELF-DEFI.

SCHOOL INNOVATION VAULT — Version 1

A Transparent, On-Chain Donation Vault for School-Wide Growth | Powered by Self-Defi

WHAT THE SCHOOL INNOVATION VAULT IS

The School Innovation Vault is a transparent, on-chain vault that supports school-wide improvements, technology upgrades, enrichment programs, and community partnerships. It is not time-locked, but all activity is governed by a strict 2-of-3 multisignature system. Every transaction is fully visible on-chain, making the vault both flexible and completely transparent.

HOW IT DIFFERS FROM THE GRADUATION VAULT

The Graduation Vault protects individual students and unlocks only at graduation using a 3-of-4 multisig with the parent required. The School Innovation Vault supports the entire school, is not time-locked, and uses a 2-of-3 multisig. It provides flexible access while preserving absolute transparency and accountability.

2-OF-3 MULTISIG GOVERNANCE

The School Innovation Vault is governed by three signers: School Official, Independent Trustee, and Community Representative. Any withdrawal requires approval from two of the three. No one person can access or spend funds alone.

HOW THE INNOVATION VAULT WORKS

- Donations flow directly into the vault - Every transaction is visible on-chain - Withdrawals require 2-of-3 approval - SD Advisors holds zero keys Schools gain flexibility while maintaining full accountability.

WHAT DONATIONS SUPPORT

- Innovation and technology upgrades - Classroom and campus improvements - Student and teacher enrichment programs - Community-based educational initiatives Every dollar is transparent, traceable, and accountable.

WHY DONORS TRUST THIS VAULT

- Full transparency - Distributed control - Permanent public ledger - Community oversight - Zero custody by SD Advisors Donors can see exactly how funds are used at any time.

ONGOING DONOR VISIBILITY

Donors can view total funds raised, transaction history, spending memos, multisig approvals, and overall vault activity at any time. This creates unmatched trust and community engagement.

GRADUATION VAULT + SCHOOL INNOVATION VAULT

Together, the two vaults create a complete decentralized funding ecosystem: one protects students until graduation; the other supports school-wide growth with transparent, multi-sig governance.

CLOSING MESSAGE

The School Innovation Vault modernizes school fundraising with transparency and accountability. Supporters can invest in real improvements, and schools gain a tool that builds trust, responsibility, and long-term community support.
